

What Does It Mean To Be College Ready?

“College Ready” implies that you have both the content knowledge and the study skills necessary to achieve academic success. This means that *what* you study is equally as vital as *how* you study.

Research indicates that students not only require development in content knowledge and conceptual understanding within these concentrations, but also in academic attitudes and study habits.

According to the Indiana Commission for Higher Education, nearly 1 in 5 students are not college ready and require remediation. Of those students:

49% require development in math

34% require development in English

17% require development in both
